

ISS World[®] Americas

**Intelligence Support Systems for Lawful Interception,
Criminal Investigations and Intelligence Gathering**

OCTOBER 11-13, 2011 • WASHINGTON, DC

ISS World 2011 Americas -- Lead and Associate Lead Sponsors

ETI Group is an international group of innovative companies with worldwide leadership within development and production of advanced analysis monitoring solutions for all types of data and telecommunication networks. Besides research and development sites in the UK and Denmark, ETI Group has global support and service groups in the US, the UK, Denmark, Spain, the U.A.E., Singapore and France

Gamma Group presents its unique IT Intrusion portfolio - FINFISHER - at the ISS World Americas 2011. The FinFisher IT Intrusion products contain the most comprehensive infection and monitoring functionality found in any other solution. The FinFisher portfolio combined with superior training at Gamma's IT Intrusion Training Institute differentiates Gamma International as the leading company in the field of cyber surveillance. For more information contact: info@gammagroup.com

HackingTeam provides the premier integrated Cyber Intelligence solution: Remote Control System (RCS). Proven by years of worldwide adoption and designed to fulfill LEAs and Security Agencies higher expectations, RCS gives you total control over Desktops and Smartphones. Offering the widest selection of infection vectors and showing total invisibility to endpoint protection systems, RCS guarantees easy installation on target devices. An integrated, easy to use Console allows you to manage and control all your operations, all from the same place. Find out more at www.hackingteam.it

Kapow Software, headquartered in Palo Alto, CA, is the fastest-growing OSINT software firm in the world. Kapow Software is used by U.S. Intelligence Community analysts and developers to collect internet content in both a targeted and broad crawl manner. The Kapow Katalyst solution is unique in that it works on every website, in every language, every time.

Ntrepid Corporation provides national security and law enforcement customers with software, hardware, and managed services for cyber operations, analytics, language technologies, and tracking systems.

Qosmos develops Network Intelligence technology (an evolution of Deep Packet Inspection), which provides real-time visibility into data as it crosses networks. The company's software development kit and hardware probes are used by Government Agencies, Law Enforcement Agencies (LEAs) and System Integrators to enhance their lawful intercept and cyber security solutions.

Headquartered in the heart of the Silicon Valley in California, SS8 is a leading worldwide provider of innovative regulatory compliant, electronic intercept and high capacity end-to-end cyber security solutions. SS8's solutions allow law enforcement and intelligence agencies to conduct lawful interception and monitoring of both circuit and packet-mode communications in accordance with local laws and standards. Since 1994, SS8 has delivered hundreds of Lawful Intercept deployments to the world's largest and most innovative carriers, national governments and law enforcement agencies.

Telesoft Technologies is committed to being a global provider of reliable and cost-effective multimedia, signaling and monitoring platforms used by the world's leading operators, OEMs and system integrators. With over 20 years of experience in SS7/signaling, media and networking we have unrivalled expertise in fixed, 2G, 3G wireless and IP networks. It is this deep understanding and experience of real-life networks, along with the close working partnerships with our customers, that sets us apart from others.

Verint® Communications Intelligence and Investigative Solutions™ help organizations efficiently collect, correlate, analyze and investigate information from virtually any communication network and data-source to neutralize criminal and terrorist threats in time to make a real impact. Built on Verint expertise accumulated over the past 20 years deploying hundreds of projects in over a thousand sites and 70 countries, these solutions are reliable, scalable, and cost effective engineered to address communication technologies today and those that emerge tomorrow.

VSS Monitoring is the world leader in Network Intelligence Optimization, providing highly-scalable solution in distributed traffic capture, in-line load balancing and deep packet inspection. The company's Network Intelligence Optimization Layer™ is the industry's only solution that can improve scalability, availability and flexibility of the network performance and security infrastructure, thereby delivering maximum network visibility and immediate return on investment.

VUPEN Security is a leading IT security company providing exclusive vulnerability research for defensive and offensive computer security operations. VUPEN provides private and highly sophisticated exploits specifically designed for the Intelligence community, LEAs, and national security organizations to help them

achieve their offensive missions using tailored and unique codes created in-house by our researchers. VUPEN also delivers highly technical vulnerability research reports to help governments and CERTs to protect critical infrastructures and assets against cyber attacks. VUPEN's customers include worldwide governments and intelligence agencies in NATO, ANZUS and ASEAN countries (for offensive security), and prominent corporations (for defensive security).
