Lead Sponsor

Nokia Siemens Networks - one of the world's largest telecommunications vendors with 60,000 employees and a leading position in all key markets across the world - is the sole company world-wide having LI solutions for both networks, target management, and Monitoring Centers. The Monitoring Center solutions have been especially developed to handle all interception tasks of Law Enforcement and Government Agencies for fixed, mobile, and IP based networks including post-processing and intelligence. <http://www.nokiasiemensnetworks.com>

Associate Lead Sponsors

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions™, offering comprehensive performance management and interaction analytics solutions for the enterprise and public safety and security markets. Advanced interaction analytics are performed on unstructured multimedia content - from telephony, web, radio and video communications. NICE brings the power of Insight from Interactions to IP contact centers, branches, and command and control centers.

Verint is a leading global provider of analytic software-based solutions for communications interception, networked video and business intelligence. Verint solutions transform voice, video and data into actionable intelligence - timely, mission critical information for faster, better informed decision making and more effective action.

SS8 Networks' Xcipio™ Lawful Intercept Products allows both carriers and switch vendors to meet legal obligations of government and law enforcement personnel to monitor conversations and transactions on both traditional and IP-based networks. SS8 Networks' packaged approach shortens internal development time and reduces costs for switch vendors and minimizes network engineering and security concerns for carriers. www.ss8.com.

Being the undisputed leader of the Italian Lawful Interception market since 1990, RCS is a multifunctional company with a huge and growing capital in terms of know-how, human resources and technology. RCS customers are divided into three main categories, with relevant differences in approach, technological background and organisation: Law Enforcement Agencies, Telecom Operators and Intelligence Services. info@rcslab.it

ETI Connect is a global provider of Lawful Intercept systems, which enable reliable, efficient and lawful monitoring on all types of communication. ETI Connect is the commercial division of the ETI Group - an international group of companies with world-class capabilities in the development and production of advanced analysis and test systems for all types of data and telecommunication networks. www.eticonnect.net

Openet is a leading worldwide provider of event processing and transaction management solutions. The Transactional Intelligence of the company's solutions extracts increased value from diverse service provider networks, enabling rapid introduction of new services and reliable, cost-effective management of existing services. Openet is focused on delivering best-in-class network edge solutions and specialized engagement processes that create business value from network activity. A global company, Openet's implementations include long-running engagements with the world's leading service providers such as British Telecom, Orange, Cingular and Verizon Wireless.

CopperEye is redefining the role of data archiving by combining the fast query access of a production database with the cost-effective, long term storage typically associated with inactive data. This capability, referred to as "live archiving", provides the unique combination of fast query access to transactions seconds after they've occurred paired with equally fast access to a virtually unlimited history of past transactions spanning weeks, months, years or even decades. CopperEye live archive solutions are delivered on small footprint hardware which allows data to be saved indefinitely without incurring sizable new demands for data center space and power.
