## SIEMENS

Global network of innovation

### Lead Sponsor

Siemens - with its 150 years of experience in the field of telecommunication – is the sole company world-wide having LI solutions for both networks, target management, and Monitoring Centers. As a part of this unmatched experience, the Monitoring Center solutions have been especially developed to handle all interception tasks of Law Enforcement Agencies for fixed, mobile, and IP based networks including post-processing and intelligence. [www.siemens.com](http://www.siemens.com)

### Associate Lead Sponsors

Spectronic is one of the world's leading suppliers of highly advanced mission-critical surveillance and communications interception equipment for government agencies, providing solutions for intercepting and decoding various types of communication methods and protocols. Our solutions are modularly designed, allowing us the flexibility to deliver complete turn-key monitoring centers, or decoding components that can be integrated into existing systems. Being the undisputed leader of the Italian Lawful Interception market since 1990, RCS is a multifunctional company with a huge and growing capital in terms of know-how, human resources and technology. RCS customers are divided into three main categories, with relevant differences in approach, technological background and organisation: Law Enforcement Agencies, Telecom Operators and Intelligence Services.

Founded and headquartered in Bad Homburg, Germany, the ATIS systems group employs approximately 200 staff, of which the majority are engineers, in 6 countries across Europe, Asia and North America. With a 60-year track record in recording technology and a nearly 15-year track record in integrated lawful interception, ATIS has been a key technology partner for Law Enforcement Agencies (LEAs), members of the public safety community, network operators and switch manufacturers. For the purpose of supporting this status, the ATIS systems group continually reinvests at least 20% of its revenues in research and development initiatives per annum in order to achieve its objective of technology leadership. ClearTrail offers carrier grade data and voice interception solutions to Law Enforcement Agencies to meet their strategic & tactical Lawful Interception requirements over a variety of communication media ranging from copper to fiber optics. ClearTrails' comprehensive integrated Lawful Interception platform is meant for interception, monitoring and analytics that encompass tactical field units for independent monitoring of GSM & consumer grade Internet networks to countrywide monitoring of PSTN, GPRS, GSM & VSAT networks at gigabit line rates.

Founded in 1997, Guidance Software is recognised worldwide as the industry leader in digital investigation solutions. Its EnCase® solutions provide the foundation for both law enforcement and corporate enterprise investigations that enable corporate, government and law enforcement agencies to conduct effective computer investigations of all types, respond promptly to eDiscovery requests, and conduct rapid and thorough internal investigations involving digital evidence, all while maintaining the forensic integrity of the data.
