Good Afternoon, I am currently assisting Darren with the organisation of the upcoming exhibition. Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made. Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August. Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June. For further promotional material please can you send me a high resolution company logo. Thanks Mandy **Mandy Taylor** Finance and Sales Administrator Providence UK <image001.gif>

**Subject:** Providence Exhibition Good morning, I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly). I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients. The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name. Please do not hesitate to contact me should you wish to discuss in further detail. Kind regards Darren Ennis Managing Director Providence UK <image001.gif> Providence, 1 Upper Barn, Grange Farm Harewood Park Estate, Harewood End, Hereford, HR2 8JS, UK

Good Afternoon, I am currently assisting Darren with the organisation of the upcoming exhibition. Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made. Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August. Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June. For further promotional material please can you send me a high resolution company logo. Thanks Mandy **Mandy Taylor** Finance and Sales Administrator Providence UK <image001.gif>

**Subject:** Providence Exhibition Good morning, I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly). I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients. The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name. Please do not hesitate to contact me should you wish to discuss in further detail. Kind regards Darren Ennis Managing Director Providence UK <image001.gif> Providence, 1 Upper Barn, Grange Farm

Good Afternoon, I am currently assisting Darren with the organisation of the upcoming exhibition. Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made. Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August. Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June. For further promotional material please can you send me a high resolution company logo. Thanks Mandy **Mandy Taylor** Finance and Sales Administrator Providence UK <image001.gif>

**Subject:** Providence Exhibition Good morning, I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly). I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients. The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name. Please do not hesitate to contact me should you wish to discuss in further detail. Kind regards Darren Ennis Managing Director Providence UK<image001.gif>Providence, 1 Upper Barn, Grange Farm

Eric,

This is a new UK partner focused on military training. In august they organize a BBQ/tradeshaw for the army community in their wonderful location: a countyard property owned by the royal family. they also invite Partners company for a halfday product exhibition.

Good Afternoon,

I am currently assisting Darren with the organisation of the upcoming exhibition.

Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made.

Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August.

Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June.

For further promotional material please can you send me a high resolution company logo.

Thanks

Mandy

**Subject:** Providence Exhibition

Good morning,

I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly).

I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients.

The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name.

Please do not hesitate to contact me should you wish to discuss in further detail.

Kind regards

Darren Ennis

Good Afternoon, I am currently assisting Darren with the organisation of the upcoming exhibition. Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made. Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August. Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June. For further promotional material please can you send me a high resolution company logo. Thanks Mandy **Mandy Taylor** Finance and Sales Administrator Providence UK <image001.gif>

**Subject:** Providence Exhibition Good morning, I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection

will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly). I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients. The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name. Please do not hesitate to contact me should you wish to discuss in further detail. Kind regards Darren Ennis Managing Director Providence UK<image001.gif>Providence, 1 Upper Barn, Grange Farm

Which event is this one? London?

And also, I see you processed the expenses. Many thanks for the quick work on that!

Enjoy the weekend,  
Eric

Good Afternoon,

I am currently assisting Darren with the organisation of the upcoming exhibition.

Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made.

Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August.

Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June.

For further promotional material please can you send me a high resolution company logo.

Thanks

Mandy

Good morning,

I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly).

I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients.

The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name.

Please do not hesitate to contact me should you wish to discuss in further detail.

Kind regards

Darren Ennis

**Oggetto:** KRS Demo - iPhone

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when we'll have this support. I would like to anticipate to you that it certainly won't be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Le 18 juin 2015 à 20:31, Peter Stolwerk <p.stolwerk@providenceitf.com> a écrit :

Hi Phillippe,

I just spoke again to the customer.

Their urgent need is with non jailbreaked IOS devices (as most of their targets use iPhone). They wait for you to come back to us and say the iphone (non jailbreak) version is ready for demonstration. They then agreed to fly to Dubai to have the demonstration. Once proven they would be willing to invest into the system. They already said that our quote was received well on the pricing but they will not invest until it delivers their iphone requirements.

Wait do you suggest?

Met vriendelijke groet, Best regards,

Peter Stolwerk Co-Owner & COO Providence Group <http://www.providenceitf.com/>

Op 18 jun. 2015 om 17:25 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Le 18 juin 2015 à 16:53, Peter Stolwerk <p.stolwerk@providenceitf.com> a écrit :

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen.

Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Hi Marco I spoke with Daniele and we never did a PoC with DANY and/or never shown them anything on iOS. We just made a proposal of project for an App and we were expecting them to sign off in order to move forward.

So we have nothing to show for the moment.

Philippe

**Oggetto:** KRS Demo - iPhone

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when we'll have this support. I would like to anticipate

to you that it certainly won't be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Hi Phillippe,

I just spoke again to the customer.

Their urgent need is with non jailbroken IOS devices (as most of their targets use iPhone). They wait for you to come back to us and say the iphone (non jailbreak) version is ready for demonstration. They then agreed to fly to Dubai to have the demonstration. Once proven they would be willing to invest into the system. They already said that our quote was received well on the pricing but they will not invest until it delivers their iphone requirements.

Wait do you suggest?

Met vriendelijke groet, Best regards,

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system than what they have seen. Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

**Oggetto:** KRS Demo - iPhone

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when we'll have this support. I would like to anticipate to you that it certainly won't be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Hi Phillippe,

I just spoke again to the customer.

Their urgent need is with non jailbreaked IOS devices (as most of their targets use iPhone). They wait for you to come back to us and say the iphone (non jailbreak) version is ready for demonstration. They then agreed to fly to Dubai to have the demonstration. Once proven they would be willing to invest into the system. They already said that our quote was received well on the pricing but they will not invest until it delivers their iphone requirements.

Wait do you suggest?

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen. Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Le 18 juin 2015 Ã 16:53, Peter Stolwerk <p.stolwerk@providenceitf.com> a Ã©crit :

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen. Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Philippe, Daniele,

Why we don't show the same POC done for DANY?  
Maybe they could buy now knowing that when ready they will have the iOS, as well.  
The question is: can we show the POC in Dubai?

What do you think?

Marco

**Oggetto:** KRS Demo - iPhone

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when weâ€™ll have this support. I would like to anticipate to you that it certainly wonâ€™t be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

Yes the demo on the 6th is fully confirmed (apologies, I thought I already confirmed with you). Only the location is still a secret...

I will meet with the teamleader next Tuesday to discuss the upcoming demo.

Until now we have no firm confirmations for the 7th (everyone is really busy) but I will keep you updated.

I also will look at a alternative date for the partner meeting.

Cheers,

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen.

Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Hi Phillipe,

Fully understand.

I spoken to the customer today and they will wait until the non jailbroken IOS can be demonstrated. They understand the challenge and this is also the challenge they are facing.

Their targets are aware of this and they only use iphone at the moment.

Please keep me update on the IOS progress.

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when we'll have this support. I would like to anticipate to you that it certainly won't be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Phillippe

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen.

Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Hi Peter,

Thanks for the update again.

As the customer now prefers to wait until the non jailbroken iOS is supported, we see no problem in postponing the demo to the Kurdistan Region Security agency till that time.

Of course, we will inform you when we'll have this support. I would like to anticipate to you that it certainly won't be before Q4 of this year.

In case the customer wants to see the demo and the solution, at least all the features and capabilities including WIFI jailbroken iOS (except non jailbroken iOS), before that date let us know.

Thanks

Philippe

Good Afternoon,

I am currently assisting Darren with the organisation of the upcoming exhibition.

Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made.

Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August.

Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June.

For further promotional material please can you send me a high resolution company logo.

Thanks

Mandy

**Cc:** Mandy Taylor  
**Subject:** Providence Exhibition

Good morning,

I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly).

I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients.

The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name.

Please do not hesitate to contact me should you wish to discuss in further detail.

Kind regards

Darren Ennis

Good Afternoon,

I am currently assisting Darren with the organisation of the upcoming exhibition.

Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made.

Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August.

Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June.

For further promotional material please can you send me a high resolution company logo.

Thanks  
Mandy

**Subject:** Providence Exhibition

Good morning,

I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly).

I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from

1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients.

The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name.

Please do not hesitate to contact me should you wish to discuss in further detail.

Kind regards

Darren Ennis

Hi Phillipe,

I just spoke again to the customer.

Their urgent need is with non jailbreaKed IOS devices (as most of their targets use iPhone). They wait for you to come back to us and say the iPhone (non jailbreak) version is ready for demonstration. They then agreed to fly to Dubai to have the demonstration. Once proven they would be willing to invest into the system. They already said that our quote was received well on the pricing but they will not invest until it delivers their iPhone requirements.

Wait do you suggest?

Met vriendelijke groet, Best regards,

Peter Stolwerk Co-Owner & COO Providence Group <http://www.providenceitf.com/>

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen. Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Thanks Phillipe,  
Can I disclose this information to the customer?  
Met vriendelijke groet, Best regards,  
Peter Stolwerk Co-Owner & COO Providence Group <http://www.providenceitf.com/>  
sent from my Iphone  
Op 18 jun. 2015 om 17:25 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

Hi Peter,

Thank you for the update. I'm glad to see that everything is ok (but the iOS non-jail broken...)

Regarding the iOS jailbroken, as an alternative to the physical infection, the only remote attack that we can do is through WIFI (so more a tactical remote attack) and the iOS should have SSH with default password. The standard jail brake process leaves the default password. So that is something additional.

For your information, we are working on iOS non jailbroken and we hope to announce it with version 10 of our solution (ISS Washington). It will be delivered as a service through a customized App that would need to be downloaded and opened by the target. That means that social engineering should be done so that the App is appealing to the targets to use.

Let's wait and see

Philippe

Hi Phillipe,

We send the quote etc to the customer this morning.

He was happy with the pricing (which in his eyes was fair and no issue).

But he is still not happy that he can't remotely infect IOS devices as he is really looking for this capability. He is now going to evaluate the system they have seen very recently compared to what we offered (both can't do the remote IOS) and most likely still wants to have a demonstration to give us a good change to show if we (HackingTeam/Providence) offer a better system then what they have seen.

Customer also applied for a schengen visa this morning but that will take another 20days before he has this.

The promised to come back to us ASAP.

I will keep you updated.

Best regards,

**Peter Stolwerk**

Good Afternoon,

I am currently assisting Darren with the organisation of the upcoming exhibition.

Firstly, please find attached our bank details for your records. If at all possible can you forward me a remittance advice once payment has been made.

Along with your remittance please can you confirm names of all attendees and if you will be participating in our evening reception at the Left Bank restaurant after set up on the 26th August.

Due to our tight schedule I need to confirm names & numbers with the restaurant by 25th June.

For further promotional material please can you send me a high resolution company logo.

Thanks

Mandy

**Subject:** Providence Exhibition

Good morning,

I am writing to update you on the exhibition scheduled for the 27th August 2015. Providence have over 100 guests already confirmed from the Police, Military and Government community. I am still finalising the exhibition floor plan and will forward as soon as it has been finalised. Each company will have a 6ft table and chair with power socket. Internet connection will be available from two independent Wi-Fi spots. (GSM coverage is quite poor on site, the entire exhibition will be sharing the Wi-Fi so please plan accordingly).

I have attached the invoice for payment. Please can you pay in advance to secure placement and if you have not already done so, send me a list of names for the exhibitors indicating if you are planning to stay for the BBQ. Set up will be from 1200hrs on the 26th August followed by an evening reception at the 'Left Bank' restaurant in Hereford. This will be open to a mixture of suppliers and clients.

The exhibition and BBQ is a non-profitable event with all proceeds going to military charities. Providence will be holding a raffle and auction during the BBQ and would welcome appropriate donations to the prize fund. Of course donations received will be announced alongside the sponsoring companies name.

Please do not hesitate to contact me should you wish to discuss in further detail.

Kind regards

Darren Ennis

Hi Peter,

Prices for Foundation Training is for your engineers that, after it, will be able to provide the same training to the end user. Instead, the advanced training is for both (end user and your engineer); normally it is performed after few months in HT premises where it's possible to meet the R&D people.

I will reply tomorrow morning for the remote assistance.

Best Regards,

--Marco Bettini

Hi Marco,

Got it and are reading through it. All clear to me so far. But just a few initial questions:

- The pricing for the professional services : Is that our price to get our staff trained and then deliver this to the customers?
- So we will then be able to deliver the foundation and advanced training?
- The remote services : how much will you charge us per hour for this?

Hope to hear from you soon.

Hi Phillipe,

Please read the attached document urgently. Just received it from the customer. As you see the customer is under pressure (and real need) and we need to act fast on this one.

We have been supporting this customer a while now and as you read they have funds to move forward if your system performs in the demonstration.

I look forward on hearing from you tomorrow morning and hopefully we can then get the quotes towards the customer and also arrange the in country demonstration on a short notice.

Hi Phillipe,

Just spoke again to the customer. Turkey is a no-go for them.

They are now exploring the option of coming to Holland ASAP (or the conference call option)

They again request urgently to send them a quotation on the requested system.

Best regards,

Good morning,

Providence UK is pleased to introduce two new employees to the team. Providence UK has gone from strength to strength the past 12 months and as such we have now expanded our team to enable us to better support our UK clients.

To assist with finance and sales processing I am pleased to introduce Mandy Taylor (cc'd). Mandy has transferred internally from the Providence group to assist in the day to day running of the office, produce sales documentation and conduct supplier and end user support.

To assist with sales, support, product development and training, I am pleased to introduce Nick Bartley (cc'd) who has recently joined us from a Law Enforcement background. Nick spent the best part of ten years in a Technical Surveillance Unit and brings a wealth of operational experience to Providence. Nick will be helping to provide daily support, advice as well as develop our product range to ensure our clients continue to get the right solutions to fulfil their operational requirements.

Providence UK has seen significant growth over the past 12 months and as such is proud to be enhancing the wider Providence Group reputation. This growth has been through the exceptional support we have seen through our client base and is something we do not forget, we trust that this has been because of our continued dedication to customer support and value for money.

Please do not hesitate to contact me to discuss in further detail and how the team can better service your needs as a supplier.

Kind regards

Darren Ennis

Managing Director

As we discussed it today, this is the teaser prepared by Rayzone to a prospective customer in Colombia. You will see how they present their teaser and case study or success story. Focus more on the content than the form :-)...I prefer Hacking Team traditional black-white and grey colors than the Rayzone rainbow colors :-)

<f.busatto@hackingteam.com>, Fabrizio Cornelli <f.cornelli@hackingteam.com>

Marco, Alessandro, Daniele,

As we discussed this topic yesterday in our meeting, attached you will find a presentation from **Rayzone Group** as a first approximation of their professional services capabilities, in particular to assist one of our customer in Latin America in the space of kidnapping and extortion (DIASE in Colombia - Anti-Secuestro and Extorsion Unit of the National Colombian Police).

They have tailored their presentation as an operation support services for Hacking Team's plan of maximizing the efficiency of attacks through Social Engineering. One of the 2 use cases being a kidnapping in Mexico (where they have operated), that matches our Colombian End-User environment. As you may know Rayzone's professional services are being used by PGJ Estado de México and Neolinx, also for their Ma-Gen capabilities.

Please take a look at the presentation, which objective is only to be a « teaser » for the customer to listen to their services capabilities. You won't see there too many secrets :-)

Rayzone is certainly more fit to work in Latin America for their presence and their Spanish speaking capabilities, compared to Providence Group in the UK (that we met today) that are certainly more fit for UK, US, Europe and probably countries in the Middle East close to the UK such as Abu Dhabi...

Password for the presentation is Milano2015.

Let me know your thoughts.

**Objet: Rép : update**

Hi Phillipe,

I just was in contact with the enduser. The requirement is really urgent (I think you understand their current situation) and they want to move forward as fast as possible.

They can't go and travel at the moment (because of ongoing operations) and really would like to have us come over to their country for the demonstration. I explained that a Providence staff member could be coming. We already have got someone on standby now to get to Italy and then move to their country straight away.

They have seen another system early this week and where promised that they could

do remote infection of mobile devices etc. But it turned out during the demo that it didn't work as promised and they actually needed the phones to be jailbroken or have physical access.

So is it possible to very fast make the arrangements for Steve Minto to come over to Italy for a full training and then afterwards fly to the customer to preform the demonstration in country?

The comment of the customer on this was that he would like to have it tomorrow but understands that we need to prepare.

I asked them if they already have one of your systems for PC. They claim that they don't have it and are actually very interested in having the system as well for PC. But the priority at the moment is with mobile.

They asked me also to urgently send a pricing proposal so that can already be reviewed.

Can you prepare a quote for me for :

- System for mobile devices alone, agent can be deployed at 10 targets at the same time
- System for mobile and PC, again agent can be deployed at 10 targets at the same time
- Incl installation on site (if possible, or again you might be able to train Providence to do this)

I think that you can see that this is a serious opportunity and hopefully together we can make it a succes.

Looking forward on hearing from you.

Best regards,

**Peter Stolwerk**

Onderwerp: Re: update

By the way Peter,

Also double-check (or triple-check) with your contact if they don't need only an upgrade of their current Galileo system so that it can manage also mobiles...

Because the same organization has already acquired the PC monitoring and adding the mobile platforms would be much cheaper than to purchase another complete system from scratch again.

So if it is a full system to monitor mobile that would be totally independent of the PC, we could do it. But frankly speaking, the strength of the solution is that the same solution can monitor both platforms for the same targets (target-centric solution independent of the platform, PC and/or Mobile).

I think it is worth trying to understand. Their organization may not be as big as to have 2 systems, no?

In case of upgrade, we'll need to discuss how to accommodate our current partner. It is not impossible.

Thanks

Philippe

Hi Peter,

Per our phone conversation, please find attached the Questionnaire that we use in order to collect information, create configuration and provide budgetary proposal.

As soon as you have it please send it back to us, and Marco will work on the Proposal.

As we discussed, the best option would be to have them traveling to Italy, Netherlands or UK. We could even take advantage of our trip to the Netherlands in July in order to meet them.

I would need to check internally the other option of training an technical expert from Providence so that this person could do the demo in the country.

Speak to you soon

Philippe

Hi Phillipe,

I spoke to te customer. He is not familiar with your system and his requirement is urgent (mobile devices only)

They would like to receive a demonstration as soon as possible at their location (they will cover cost for flight/hotel etc)

Also they urgently need a quote for :

1 x Full system (for mobile devices) 1 x installation on site 1 x one year maintenance 10 x user license

Looking forward on hearing from you

Onderwerp: Re: update

By the way Peter,

Also double-check (or triple-check) with your contact if they don't need only an upgrade of their current Galileo system so that it can manage also mobiles... Because the same organization has already acquired the PC monitoring and adding the mobile platforms would be much cheaper than to purchase another complete system from scratch again.

So if it is a full system to monitor mobile that would be totally independent of the PC, we could do it. But frankly speaking, the strength of the solution is that the same solution can monitor both platforms for the same targets (target-centric solution independent of the platform, PC and/or Mobile).

I think it is worth trying to understand. Their organization may not be as big as to have 2 systems, no?

In case of upgrade, we'll need to discuss how to accommodate our current partner. It is not impossible.

Thanks

Philippe

Hi Peter,

Per our phone conversation, please find attached the Questionnaire that we use in order to collect information, create configuration and provide budgetary proposal. As soon as you have it please send it back to us, and Marco will work on the Proposal.

As we discussed, the best option would be to have them traveling to Italy, Netherlands or UK. We could even take advantage of our trip to the Netherlands in July in order to meet them.

I would need to check internally the other option of training an technical expert from Providence so that this person could do the demo in the country.

Speak to you soon

Philippe

Hi everybodyLet's discuss this tomorrow to see how we can answer to Providence on this Kurdistan urgent project. See email exchanges below.This division seems not to be aware of the Galileo installed for PCs. Did our partner in Germany actually install it ? :-)

Philippe

**Objet: Rép : update**

Hi Phillipe,

I just was in contact with the enduser. The requirement is really urgent (I think you understand their current situation) and they want to move forward as fast as possible.

They can't go and travel at the moment (because of ongoing operations) and really would like to have us come over to their country for the demonstration. I explained that a Providence staff member could be coming. We already have got someone on standby now to get to Italy and then move to their country straight away.

They have seen another system early this week and where promised that they could do remote infection of mobile devices etc. But it turned out during the demo that it didn't work as promised and they actually needed the phones to be jailbroken or have physical access.

So is it possible to very fast make the arrangements for Steve Minto to come over to Italy for a full training and then afterwards fly to the customer to preform the demonstration in country?

The comment of the customer on this was that he would like to have it tomorrow but understands that we need to prepare.

I asked them if they already have one of your systems for PC. They claim that they don't have it and are actually very interested in having the system as well for PC. But the priority at the moment is with mobile.

They asked me also to urgently send a pricing proposal so that can already be reviewed.

Can you prepare a quote for me for :

- System for mobile devices alone, agent can be deployed at 10 targets at the same time
- System for mobile and PC, again agent can be deployed at 10 targets at the same time
- Incl installation on site (if possible, or again you might be able to train Providence to do this)

I think that you can see that this is a serious opportunity and hopefully together we can make it a succes.

Looking forward on hearing from you.

Best regards,

Onderwerp: Re: update

Hi Peter,  
Per our phone conversation, please find attached the Questionnaire that we use in order to collect information, create configuration and provide budgetary proposal. As soon as you have it please send it back to us, and Marco will work on the Proposal.  
As we discussed, the best option would be to have them traveling to Italy, Netherlands or UK. We could even take advantage of our trip to the Netherlands in July in order to meet them.

I would need to check internally the other option of training an technical expert from Providence so that this person could do the demo in the country.  
Speak to you soon  
Philippe

Hello Giancarlo,

We have only one U-Cap left and it was not put to gather in a nice way. I will need to replace the unit with a new Batch which will arrive any day now.

As soon as this Batch comes in, I will let you know and ship the order (Unlocker and U-Cap) straight away.

Best regards, **Edwin van de Ruit**

Hi Phillipe,

I spoke to te customer. He is not familiar with your system and his requirement is urgent (mobile devices only)

They would like to receive a demonstration as soon as possible at their location (they will cover cost for flight/hotel etc)

Also they urgently need a quote for :

1 x Full system (for mobile devices) 1 x installation on side 1 x one year maintenance 10 x user license

Looking forward on hearing from you

Best regards,

**Peter Stolwerk**

OK. Perfect.

Regarding Jos, yes I think it could be a good idea for you to reach him out and let him know that we will be visiting the cyber unit. He may give you some insights.

Jos visited our booth during the Security & Policing UK conference in Farnborough.

He stayed quite long with us, almost 50 minutes, during which we did a very complete demonstration of Galileo. So he was able to see different infections (PC and mobiles) and have a look at the evidence that were collected.

I remember he said he was impressed and that was indeed the type of solution that the Dutch Police should have in order to improve their investigations. So I believe he can be a supporter of the solution internally.

Thanks

Philippe

Hi Phillippe,

We will let you know asap where the location will be (they are a bit secretive about it).

Yes I know those Police Officers really well. Especially Jos van de Oetelaar. He is actually promoted as a chief of the National Technical Support unit.

I don't believe they will be present at this meeting as you will meet the cyber and digital forensics department (but they are from the same unit as Jos etc). They are

the unit working with your kind of solutions.

Do you want me to reach out to Jos? If so, I need a bit more background info (what did he want etc). I have his contact details.

Best regards,  
Peter Stolwerk

Op 15 jun. 2015, om 15:08 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

Hi Peter,

Great. We will arrange our flight to Amsterdam on the morning of the 6th. As soon as you have the location of the meeting, please tell us so that we know if we need to arrange a rent a car or if we go by train (whatever easier based on the location).

Regarding the people from the Dutch Police that visited our booth in March 2015 in Farnborough, you'll find below their detail:s - Jos van den Oetelaar - expert technical surveillance and support - Noord-en Oost-Gelderland - Criminal Investigation Department - Apeldoorn - Fred Wemeijen - Dutch police

Let me know if you know them.

Lorenzo Invernizzi will be Hacking Team's Field Application Engineer that will perform the Galileo demo. Marco Bettini and/or myself will be able to join as well.

Let us know if you need your id or passport previously to the meeting.

Thanks Philippe

Hi Philippe,

Good news, we got a confirmation from the Dutch Police.

Meeting is confirmed on the 6th (after lunchtime) for the presentation. They arranged a secure facility with the necessary requirements. We will get the details of the location later.

We will know push for meetings with the other customers on the 7th and 8th..

Cheers, **Peter Stolwerk**

Hi Peter,  
I have checked internally with Alessandro and confirmed that a FAE would be available for the days mentioned in the email below: 6th, 7th or 8th. If the 6th, I would suggest the afternoon, so that we have time to travel in the morning.  
Best regards

Hi Peter,  
That sounds great.

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLPD that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

OK. Perfect.

Regarding Jos, yes I think it could be a good idea for you to reach him out and let him know that we will be visiting the cyber unit. He may give you some insights.

Jos visited our booth during the Security & Policing UK conference in Farnborough.

He stayed quite long with us, almost 50 minutes, during which we did a very complete demonstration of Galileo. So he was able to see different infections (PC and mobiles) and have a look at the evidence that were collected.

I remember he said he was impressed and that was indeed the type of solution that the Dutch Police should have in order to improve their investigations. So I believe he can be a supporter of the solution internally.

Thanks

Philippe

Hi Phillippe,

We will let you know asap where the location will be (they are a bit secretive about it).

Yes I know those Police Officers really well. Especially Jos van de Oetelaar. He is actually promoted as a chief of the National Technical Support unit.

I don't believe they will be present at this meeting as you will meet the cyber and digital forensics department (but they are from the same unit as Jos etc). They are

the unit working with your kind of solutions.

Do you want me to reach out to Jos? If so, I need a bit more background info (what did he want etc). I have his contact details.

Best regards,  
Peter Stolwerk

Op 15 jun. 2015, om 15:08 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

Hi Peter,

Great. We will arrange our flight to Amsterdam on the morning of the 6th. As soon as you have the location of the meeting, please tell us so that we know if we need to arrange a rent a car or if we go by train (whatever easier based on the location).

Regarding the people from the Dutch Police that visited our booth in March 2015 in Farnborough, you'll find below their detail:s - Jos van den Oetelaar - expert technical surveillance and support - Noord-en Oost-Gelderland - Criminal Investigation Department - Apeldoorn - Fred Wemeijen - Dutch police

Let me know if you know them.

Lorenzo Invernizzi will be Hacking Team's Field Application Engineer that will perform the Galileo demo. Marco Bettini and/or myself will be able to join as well.

Let us know if you need your id or passport previously to the meeting.

Thanks Philippe

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLDP that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

OK. Perfect.

Regarding Jos, yes I think it could be a good idea for you to reach him out and let him know that we will be visiting the cyber unit. He may give you some insights. Jos visited our booth during the Security & Policing UK conference in Farnborough. He stayed quite long with us, almost 50 minutes, during which we did a very complete demonstration of Galileo. So he was able to see different infections (PC and mobiles) and have a look at the evidence that were collected.

I remember he said he was impressed and that was indeed the type of solution that the Dutch Police should have in order to improve their investigations. So I believe he can be a supporter of the solution internally.

Thanks

Philippe

Hi Phillippe,

We will let you know asap where the location will be (they are a bit secretive about it).

Yes I know those Police Officers really well. Especially Jos van de Oetelaar. He is actually promoted as a chief of the National Technical Support unit.

I don't believe they will be present at this meeting as you will meet the cyber and digital forensics department (but they are from the same unit as Jos etc). They are the unit working with your kind of solutions.

Do you want me to reach out to Jos? If so, I need a bit more background info (what did he want etc). I have his contact details.

Best regards,  
Peter Stolwerk

Op 15 jun. 2015, om 15:08 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

Hi Peter,

Great. We will arrange our flight to Amsterdam on the morning of the 6th. As soon as you have the location of the meeting, please tell us so that we know if we need to arrange a rent a car or if we go by train (whatever easier based on the location).

Regarding the people from the Dutch Police that visited our booth in March 2015 in Farnborough, you'll find below their detail:s - Jos van den Oetelaar - expert technical surveillance and support - Noord-en Oost-Gelderland - Criminal Investigation Department - Apeldoorn - Fred Wemeijen - Dutch police

Let me know if you know them.

Lorenzo Invernizzi will be Hacking Team's Field Application Engineer that will perform the Galileo demo. Marco Bettini and/or myself will be able to join as well.

Let us know if you need your id or passport previously to the meeting.

Thanks Phillippe

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in

the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLPD that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

Hi Phillippe,

The police just came back to us that they would like to have a demonstration in the first two weeks of July (that is when their main technician will be present). Would this be possible for you?

Once we fix a date for them, we will then organize meetings with the other relevant customers in NL.

Met vriendelijke groet, Best regards,

Peter Stolwerk Co-Owner & COO Providence Group <http://www.providenceitf.com/>

Op 8 jun. 2015 om 13:01 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

OK. Perfect.

Regarding Jos, yes I think you can reach him out and let him know that we will be visiting the cyber unit. He may give you some insights.

Jos visited our booth during the Security & Policing UK conference in Farnborough. He stayed quite long with us as

**A:** ssl  
**Oggetto:** ISS Prague Notes

Hi guys,

As we have not been able to meet in order to debrief and exchange on ISS Prague, I prefer to write down in an email the most significant information for your review. And in case you have questions, you can come back to me.

**On NICE / Elbit:**Yossi, Avi and Adam were present in NICE booth. Yochai Corem from Elbit was also present (no ELBIT booth)NICE's purchase by ELBIT was a « surprise » for NICE employees. Including Avi. He looked sincere.Integration will go quick (under the name of Cyberbit). Objective to do it in 2 weeks. Avi said, when you'll be in Tel Aviv, we will have more information on the integration.Avi was « surprised » and knew already that HT was working with ELBIT. I believe they see it positively. Better than if ELBIT was working with somebody else. That should not have an impact on existing opportunities.Danielle (Danish Army's tender) was won by NICE against BAE, UK and Verint (Intelligence got from BAE, see below).

**On BAE UK:**BAE answered to Danielle's tender with FinFisher, against NICE / HT.NICE had the lowest price: 3M€ for the complete deal, including HT's. BAE quoted 4,5 to 5M€. BAE believes that NICE will have trouble to deliver everything they promised. So we need to be careful when handling the delivery of our part.My BAE contact told me that the tender they entered with FinFisher is probably the reason why BAE postponed the meeting with Hacking Team to after summer.Now it is an excellent occasion for us to recontact. I'm taking the action. I prefer BAE to answer with us also, instead of FF in the future. Same as Vastech.

**On France GIC / MOI:**4 persons attended the Demo session. Discussion after the demo with Head of GIC department.The new Law in France passed in the Parliament. Now needs to be voted in the Senate.Next step is to do a private demo / more technical in Paris or Milan.Also interested in SSL decryptor with their provider (Aqsacom probably).

**On Partners: Chenega and Providence:**Both extremely interested by our approach to train them first so that they can get back to us with a training adapted to our product (2 persons each)  
Met with Chenega President Military, Intelligence & Operations support. Potential US commercial partner. Small + Minority company. Chenega was aware of CyberCommand Tender.  
Providence is able to organize a meeting KLPD + NL Intel demo. KLPD/Dutch Police meeting will be July 6th.

**On Telecom Italia:**Met and introduced Daniele to the person in charge inside Telecom Italia of Lawful Interception. Extremely interested.  
The rest we can discuss.

Hi guys,

As we have not been able to meet in order to debrief and exchange on ISS Prague, I prefer to write down in an email the most significant information for your review. And in case you have questions, you can come back to me.

**On NICE / Elbit:**Yossi, Avi and Adam were present in NICE booth. Yochai Corem from Elbit was also present (no ELBIT booth)NICE's purchase by ELBIT was a « surprise » for NICE employees. Including Avi. He looked sincere.Integration will go quick (under the name of Cyberbit). Objective to do it in 2 weeks. Avi said, when you'll be in Tel Aviv, we will have more information on the integration.Avi was « surprised » and knew already that HT was working with ELBIT. I believe they see it positively. Better than if ELBIT was working with somebody else. That should not have an impact on existing opportunities.Danielle (Danish Army's tender) was won by NICE against BAE, UK and Verint (Intelligence got from BAE, see below).

**On BAE UK:**BAE answered to Danielle's tender with FinFisher, against NICE / HT.NICE had the lowest price: 3M€ for the complete deal, including HT's. BAE quoted 4,5 to 5M€. BAE believes that NICE will have trouble to deliver everything they promised. So we need to be careful when handling the delivery of our part.My BAE contact told me that the tender they entered with FinFisher is probably the reason why BAE postponed the meeting with Hacking Team to after summer.Now it is an excellent occasion for us to recontact. I'm taking the action. I prefer BAE to answer with us also, instead of FF in the future. Same as Vastech.

**On France GIC / MOI:**4 persons attended the Demo session. Discussion after the demo with Head of GIC department.The new Law in France passed in the Parliament. Now needs to be voted in the Senate.Next step is to do a private demo / more technical in Paris or Milan.Also interested in SSL decryptor with their provider (Aqsacom probably).

**On Partners: Chenega and Providence:**Both extremely interested by our approach to train them first so that they can get back to us with a training adapted to our product (2 persons each)  
Met with Chenega President Military, Intelligence & Operations support. Potential US commercial partner. Small + Minority company. Chenega was aware of CyberCommand Tender.  
Providence is able to organize a meeting KLPD + NL Intel demo. KLPD/Dutch Police meeting will be July 6th.

Hi guys,

As we have not been able to meet in order to debrief and exchange on ISS Prague, I prefer to write down in an email the most significant information for your review. And in case you have questions, you can come back to me.

**On NICE / Elbit:**Yossi, Avi and Adam were present in NICE booth. Yochai Corem from Elbit was also present (no ELBIT booth)NICE's purchase by ELBIT was a « surprise » for NICE employees. Including Avi. He looked sincere.Integration will go quick (under the name of Cyberbit). Objective to do it in 2 weeks. Avi said, when you'll be in Tel Aviv, we will have more information on the integration.Avi was « surprised » and knew already that HT was working with ELBIT. I believe they see it

positively. Better than if ELBIT was working with somebody else. That should not have an impact on existing opportunities. Danielle (Danish Army's tender) was won by NICE against BAE, UK and Verint (Intelligence got from BAE, see below).

**On BAE UK:**BAE answered to Danielle's tender with FinFisher, against NICE / HT.NICE had the lowest price: 3M€ for the complete deal, including HT's. BAE quoted 4,5 to 5M€. BAE believes that NICE will have trouble to deliver everything they promised. My BAE contact told me that the tender they entered with FinFisher is probably the reason why BAE postponed the meeting with Hacking Team to after summer.Now it is an excellent occasion for us to recontact. I'm taking the action. I prefer BAE to answer with us also, instead of FF in the future. Same as Vastech.

**On France GIC / MOI:**4 persons attended the Demo session. Discussion after the demo with Head of GIC department.The new Law in France passed in the Parliament. Now needs to be voted in the Senate.Next step is to do a private demo / more technical in Paris or Milan.Also interested in SSL decryptor with their provider (Aqsacom probably).

**On Partners: Chenega and Providence:**Both extremely interested by our approach to train them first so that they can get back to us with a training adapted to our product (2 persons each)

Met with Chenega President Military, Intelligence & Operations support. Potential US commercial partner. Small + Minority company. Chenega was aware of CyberCommand Tender.

Providence is able to organize a meeting KLPD + NL Intel demo. KLPD/Dutch Police meeting will be Ju

**Oggetto:** Re: Travel to the Netherlands

Hi Peter,

Great. We will arrange our flight to Amsterdam on the morning of the 6th. As soon as you have the location of the meeting, please tell us so that we know if we need to arrange a rent a car or if we go by train (whatever easier based on the location).

Regarding the people from the Dutch Police that visited our booth in March 2015 in Farnborough, you'll find below their detail:s

- Jos van den Oetelaar - expert technical surveillance and support - Noord-en Oost-Gelderland - Criminal Investigation Department - Apeldoorn

- Fred Wemeijen - Dutch police

Let me know if you know them.

Lorenzo Invernizzi will be Hacking Team's Field Application Engineer that will perform the Galileo demo. Marco Bettini and/or myself will be able to join as well.

Let us know if you need your id or passport previously to the meeting.

Thanks

Philippe

Hi Philippe,

Good news, we got a confirmation from the Dutch Police.

Meeting is confirmed on the 6th (after lunchtime) for the presentation. They arranged a secure facility with the necessary requirements. We will get the details of the location later.

We will know push for meetings with the other customers on the 7th and 8th..

Cheers,

Hi Peter,

I have checked internally with Alessandro and confirmed that a FAE would be available for the days mentioned in the email below: 6th, 7th or 8th. If the 6th, I would suggest the afternoon, so that we have time to travel in the morning.

Best regards

Philippe

Hi Peter,

That sounds great.

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLPD that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

Hi Peter,

Great. We will arrange our flight to Amsterdam on the morning of the 6th. As soon as you have the location of the meeting, please tell us so that we know if we need to arrange a rent a car or if we go by train (whatever easier based on the location).

Regarding the people from the Dutch Police that visited our booth in March 2015 in Farnborough, you'll find below their detail:s- Jos van den Oetelaar - expert technical surveillance and support - Noord-en Oost-Gelderland - Criminal Investigation

Department - Apeldoorn- Fred Wemeijen - Dutch police

Let me know if you know them.

Lorenzo Invernizzi will be Hacking Team's Field Application Engineer that will perform the Galileo demo. Marco Bettini and/or myself will be able to join as well.

Let us know if you need your id or passport previously to the meeting.

Thanks Philippe

Hi Peter,

I have checked internally with Alessandro and confirmed that a FAE would be available for the days mentioned in the email below: 6th, 7th or 8th. If the 6th, I would suggest the afternoon, so that we have time to travel in the morning.

Best regards

Philippe

Hi Philippe,

Good news, we got a confirmation from the Dutch Police.

Meeting is confirmed on the 6th (after lunchtime) for the presentation. They arranged a secure facility with the necessary requirements. We will get the details of the location later.

We will know push for meetings with the other customers on the 7th and 8th..

Cheers,

Onderwerp: Re: Travel to the Netherlands

Hi Peter,

I have checked internally with Alessandro and confirmed that a FAE would be available for the days mentioned in the email below: 6th, 7th or 8th. If the 6th, I would suggest the afternoon, so that we have time to travel in the morning.

Best regards

Philippe

Hi Peter,

That sounds great.

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLPD that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

Philippe

Op 8 jun. 2015 om 13:01 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

Hi Jessica,

thank you very much for the quotation. If you can include the delivery cost to Italy it will appreciated.

Thanks

Giancarlo

On 6/9/2015 3:42 PM, Jessica van der linden wrote:

Dear Giancarlo,

Attached is the quotation for one Unlocker and one U-Cap, as discussed with Peter Stolwerk (on copy).

This quote is based on the delivery term ex-works, if you want me to quote you with the shipping included please let me know.

Hi Peter,

I have checked internally with Alessandro and confirmed that a FAE would be available for the days mentioned in the email below: 6th, 7th or 8th. If the 6th, I would suggest the afternoon, so that we have time to travel in the morning.

Best regards

Philippe

Hi Peter,

That sounds great.

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLDP that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

Philippe

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution

and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe

Hi Peter,  
I have checked internally with Alessandro and confirmed that a FAE would be available for the

Hi Peter,

That sounds great.

On my side, the week of July 6th looks good (better if beginning of the week, such as July 6th, 7th or 8th). Let me check with Alessandro the availability of a Field Application Engineer that week for the demo. I confirm as soon as possible. Let us know if those days are OK for them as well.

I am attaching again the one-page description of the demo that we will perform in the Police. Do not hesitate to transfer and send them the document. Could you please make sure that they will have the cabled internet connection ?

I will also send you tomorrow the names of the 2 persons from KLPD that visited our booth in UK Security & Policy (Farnborough), so that you could check if they are in the same organization.

Let's touch base again tomorrow.

Philippe

Hi Phillippe,

The police just came back to us that they would like to have a demonstration in the first two weeks of July (that is when their main technician will be present). Would this be possible for you?

Once we fix a date for them, we will then organize meetings with the other relevant customers in NL.

Met vriendelijke groet, Best regards,

Peter Stolwerk Co-Owner & COO Providence Group <http://www.providenceitf.com/>

Op 8 jun. 2015 om 13:01 heeft Philippe Vinci <p.vinci@hackingteam.com> het volgende geschreven:

H Peter,

It was nice catching-up with you last week during ISS.

As promised I'm coming back to you regarding the RCS training in Milan. Our objective is to train you during a partner training for 2 full days so that you can come back to us with a Social Engineering training that is already adapted to our solution and to our customer's needs.

Our best alternative date would be **June 30th to July 1st** in Milan. How would those dates fit with the respective agenda of the 2 persons from Providence who will participate ?

Let me know as soon as you can, as we are also checking availability of the other partner.

Regarding the trip to the Netherlands and the presentation/demo to National Police (ex KLPD) and Netherland Intelligence, let me know which are the best dates/alternatives so that we can book the week and the presence of a Field Application Engineer.

Thanks in advance

Philippe
