Hi Anas,

Please find attached a document describing the DELL server requirements for the FFDD. By using the specifications in this document, AGT can order the servers directly themselves from DELL and might be able to negotiate a good margin with DELL. Also we cannot export USA Dell servers to Syria, so we need AGT to order them locally, or order non DELL-servers as described in the document. The proxy server software will come with an easy installation script so that should not be difficult to install for the AGT engineers.

Kind regards,
