Remote Control System Training Schedules

Schedule 1 (mandatory)	*Welcome and introduction*	○ Field of application (active interception, spyware based interception systems), ○ Core concepts (Da Vinci client-server model, Da Vinci interaction diagrams, System Actors) ○ Architectural model (block diagram, processes)
	Console basics	○ Navigation and Buttons ○ Recent Items ○ Quick Launch Buttons ○ Basic configurations ○ Search forms
	Architecture	○ Core components (collectors, master db server, shard db servers, consoles) ○ Network components (Network Injectors, Anonymizers), ○ Additional modules (Alerting system, RMI modems) ○ Running processes and data flow model

Schedule 2 (mandatory)	*Operation & User Management*	○ **Lesson:** Accounting: Operations, Groups, Users, Targets, Agents ○ **Lesson:** Administrators, System Admins, Technicians, Analysts ○ **Hands-on**: Accounting ,Operation, Auditing
	Agents Factory : creating and configuring Da Vinci agents	○ **Lesson:** What to know before: Consciousness and Awareness of Intention ○ **Hands-on**: Basic configuration ○ **Lesson:** Event driven logic and how to approach ○ **Hands-on**: Advanced Configuration: Events, Actions, Modules ○ Things you should never do
	Application building (cross Platform)	○ Windows Executable ○ Mac Application ○ Blackberry's COD ○ Iphone's App ○ Android's APK ○ Windows Mobile's CAB ○ Symbian's SYS
	Evidence analysis	○ Browsing and marking evidences ○ The dashboard ○ Filtering ○ Exporting

Schedule 3 – Infection Vectors (based on what purchased)	*Native Applications*	○ Melting with native applications ○ Optional modules
	Offline tools	○ Bootable CD ○ Bootable USB ○ U3
	Mobile Infection	○ SD Card Infection ○ Infection from PC ○ QR Code
	Infection Module	○ Local users ○ USB Drives ○ VMWare virtual machines
	Exploits	○ *Using social exploits* ○ *Leveraging on Zeroday exploits*
	Remote Mobile Infection	○ *Wap Push messages* ○ *Service Loading* ○ *Service Indication*

Schedule 4 – Network Injector	*Installation*	○ Appliance Injector ○ Tactical Injector ○ Update
	WiFi Options	○ Cracking capabilities
	Target Recognition	○ IP Address ○ RADIUS ○ DHCP ○ String matching
	Resource Infection	○ Identifying the resource to infect
	Infection Types	○ Downloaded Application ○ Web page injection ○ Fake upgrade

Schedule 5 – System	*Network setup*	○ Frontend ○ Backend
	Anonyimizers	○ Installation ○ Configuration ○ Upgrade
	Monitoring	○ System Health
	Backup	○ Scheduling ○ Restoring
	Troubleshooting	○ Audit logs ○ Application logs ○ System logs

HowTos	*Obtaining a bootable USB drive*
	Symbian Signing
	Delivering on Iphone
