

18 August 2017

Dear ...,

Please see our response below.

We do not permit the use of any software, including crawlers, bots, browser plug-ins, or browser extensions (also called "add-ons"), that scrape or copy member data, or that automate activity on or alter the appearance of LinkedIn pages. Such tools are prohibited by LinkedIn's User Agreement, and may violate the law. LinkedIn has technical measures and defenses in place to protect against the use of scraping tools on our platform, and we are constantly working to improve them.

Best Regards,

...
